FOR IMMEDIATE RELEASE

Panther Premium Logistics Begins Move to Sharon Township

Panther Premium Logistics Chief Executive Officer R. Louis Schneeberger announced today that the company has completed its relocation from its Seville, Ohio location to its new corporate headquarters and dispatch center in Sharon Township.

The new facility includes 50,000 square feet of office space and a 9,000 square-foot service bay for applying decals and GPS units to trucks. Initial employment for the space is projected to be approximately 330 people.

"We've had tremendous growth since our founding in 1992," Schneeberger said. "We've been in Medina County more than two decades, and staying in Medina County was an important consideration for us as we selected this new location."

Panther's new headquarters is located within Medina County's newest Community Reinvestment Area. Initial employment at the new facility is expected to top 330 employees, and the company anticipates adding at least 32 jobs over the next four years.

"We've been operating out of two separate buildings in Seville," Schneeberger explained. "The new site will allow us to continue to grow our Medina County headquarters under a single roof."

Panther Premium Logistics is one of the best-known providers of premium logistics services including time-sensitive, mission-critical and white glove delivery. The company solves shipping and logistics challenges through its global network of owner operators and partners specializing in ground, air, and ocean shipping.

ArcBest Corporation purchased the company — formerly known as Panther Expedited Services — in June of 2012.
